

# Foamer Simpson

**Handy, Pump-Up Foamer Delivering Rich, Thick Foam**

Get thick, rich foam for a fraction of the cost with Foamer Simpson™. The manual pump construction saves money versus power foamers while producing foam similar to shaving cream for measurable results and quality service. The Foamer Simpson™ is ideal for use with InVade™ Bio Foam™ or any other foaming product.

- This new design Foamer Simpson is more durable and simpler to use!
- The pumping mechanism is more durable with a metal insert.
- The hose mechanism has been replaced with a heavier duty hose and a more durable metal hose barb connecting it to the gun.
- The adjustment valve has been eliminated and the air uptake is now calibrated to yield the foam thickness ideal for InVade Bio Foam treatments.
- Durable plastic construction and light weight make servicing job sites easy and reliable
- 2 gallon capacity
- Includes fan spray nozzle and 18" extension wand
- Every part is available should a replacement be necessary

The Foamer Simpson™ Standard Part Kit is also available. It comes with four foam inserts, two O-rings, a double hose barb (plastic), and a pressure relief valve; the most commonly ordered replacement parts

**Product Code:**

**FSPU002: 2 gallon pump up foamer with 18" extension wand**

Instruction sheet available at [www.rockwelllabs.com](http://www.rockwelllabs.com)

## Replacement Part Product Codes

1. Black Pump Assembly	(FSPT001)	9. Stainless Steel Spray Tip	(FSPT009)
2. Pressure Relief Valve	(FSPT002)	10. Poly Extension Wand	(FSPT010)
3. Two Gallon Tank	(FSPT003)	11. Extra Foam Inserts	(FSPT011)
4. Pick-Up Tube	(FSPT004)	12. Extra O-Rings	(FSPT012)
5. 48" Single Line Hose w/Tank Nut	(FSPT014)		
6. Stainless Steel Hose Barb	(FSPTB1238)		
7. Poly Spray Gun w/O Rings	(FSPT007)		
8. 4" Poly Wand w/Foam Insert	(FSPT008)
