SprayDoser[™]

Programmable Spray Doser for Applying Probiotic Cleaners Over a Wide Area

The InVade[™] Spray Doser is perfect for dumpsters, trash chutes, compactors or any area with organic build up or persistent odors. Virtually any area with problematic organic build up can benefit from spray dosing with probiotic cleaners. The InVade[™] Spray Doser Mounts to a wall and the input tube is placed into a container (bucket, jug, drum) of the product to be sprayed. A diluted solution of InVade[™] Bio Cleaner[™] (page 34) is ideal. The output tube is mounted so that the spray covers the area to be treated. The timer is set so that the unit activates and sprays for the desired length of time and interval.

Product Code:

**ISDS120 - one pump, power cord,
tubing, spray tip, connectors, mounting
screws and key**
