

PFT™

station

Yellow Hanging Station for Baiting, Trapping & Monitoring Flying Insects

The **Yellow PFT™ Station** features a retainer ring with a molded-in aperture disk for trapping most insects. If a larger opening is needed for use as a bait station, or for trapping pantry moths, the disk easily pops out. The standard 16 oz drink cup makes servicing a snap! When it gets full or dirty the cup can be thrown away and the sturdy station can be used over and over again! When used with the appropriate InVite lure the PFT™ Station will attract a wide range of pests.

Instruction sheets are available at www.rockwelllabs.com.
