## revolutionary biopesticide for the control and prevention of bed bugs

Aprehend® is a novel biopesticide that uses *Beauveria bassiana*, a naturally occurring fungal spore, in an oil-based formulation applied as a barrier spray that bed bugs cross when going to feed. The spores stick to the legs and body of the bug and are taken back to the harborage where they are spread among the bed bug population by direct transfer.

- Ready-to-use. No mixing or dilution required.
- Minimal preparation required for customer and PMP, plus no two-week follow-up saves time and money.
- Bed bug adults and nymphs that come into contact with the spores will become infected and die within 4-10 days.
- Provides control for up to 3 months for extended protection.
- Prevents the establishment of bed bug populations when applied quarterly (every 3 months).
- Effective against pyrethroid and neonic-resistant bed bugs.
- Virtually odorless / Non-repellent.

**Note: Aprehend® applications require use of the Aprehend® low-volume, low-pressure sprayer kit.**

The specially-designed Aprehend® spray kit provides the required 2" band with proper spray pattern when held approximately 4" from the surface being sprayed. The Trigger-Lock feature allows the spray gun to be used with a continuous spray when the button is in the locked position. On/off is controlled via the battery. The pouch strap adjusts from 28–59 inches (71-150cm) for use as a waist, shoulder, or crossbody pouch.

Deluxe Sprayer Kit includes:

- Custom pouch with expandable strap
- Spray gun with 3 fl oz / 89 mL reservoir
- Compressor and A/C adaptor
- Coiled hose
- Rechargeable Lithium Ion battery
- Lithium battery wall charger, 12.6V
- Lithium battery 12V DC car charger
- Compressor A/C wall adapter
- Spray gun extension wand kit

# InVade®

## bio sanitation

### InVade® Bio Foam

**Concentrate for high volume foaming**

IBFC016-12: 16 fl oz tip-n-measure bottle, 12 per case

IBFC128-4: 1 gallon jug with pump top, 4 per case

### InVade® Bio Drain

**Thickened gel formulation for coating action**

IBDC032-12: 1 quart bottle (8 applications), 12 per case

IBDC128-4: 1 gallon jug (32 applications), 4 per case

IBDC005: 5 gallon pail (160 applications)

IBDC055: 55 gallon drum

### InVade® Hot Spot+

**Long-lasting, 4-way action aerosol foam**

IHSF019-12: 19 oz aerosol can with one injection straw per can

and one 24" extension hose per case of 12

### InVade® Bio Cleaner

**4-in-1 cleaner for mopping and hard surfaces**

IBCC032-12: 1 qt bottle with foaming spray top, 12 per case

IBCC128-4: 1 gallon jug (32 applications), pump top available, 4 per case

IBCC005: 5 gallon pail with pour spout (160 applications), pump top available

IBDC055: 55 gallon drum

### InVade® Bio Bullet

**Continuous release blocks for drains and traps**

IBBL036: 36 x 50 g beverage tray bullets (2.43" x 1.5" x 0.5")

IBBM015: 15 x 100 g mini bullets (2.63" x 0.75")

IBBL121: 12 x 1 lb bullets (2.63" x 3.25") in nets

IBBL405: 4 x 5 lb bullets (2.63" x 5.25" x 9.25"), 2 - 2.5 lb bullets in one net

## EQUIPMENT

### Foamer Simpson 5.0 (in group picture)

**Economical manual pump foamer that delivers rich, thick foam**

FSPU005: 5 liter pump-up foamer with 17" wand and 6' hose

### Power Foamer (in group picture)

**Power foamer with long-life rechargeable battery**

FIKE010: 10 liter foamer with 18.5" wand and 51" hose, also includes compressed air valve

### InVade Mini Doser (not pictured)

IDDS316: programmable doser for continuous drain and trap treatment

### InVade Spray Doser (not pictured)

ISDS120: programmable sprayer for trash chutes, dumpsters and other areas

## the industry's leading bio sanitation range

InVade® products are the ultimate green cleaners that work more effectively than simple chemical cleaners in areas with chronic moisture and organic matter.

- Powerful probiotics digest organic matter, breaking it down to water and CO<sub>2</sub>.
- Premium blend of natural microbe spores that activate when in contact with their food source (organic debris).
- Includes six strains that digest FOG (fats, oils, and grease), protein, carbohydrates, cellulose, and urea.
- Rapid odor elimination.
- Grease and organic debris removal.
- Reduction in slip and fall liability from cleaner floors.
- Visual improvements from eliminating black gunk build-up along edges and grout lines.
- Won't harm septic systems or municipal water treatment operations.

## superfine 99% boric acid dust & stations for baiting and trapping

### • BorActin Insecticide Powder

- Milled to a superfine powder in a pharmaceutical-grade air mill, for superior adhesion to insects.
- Long-lasting and odorless mineral, not affected by heat or UV light. Remains active until removed.
- Application to scummy areas where sanitation pests feed effectively turns the organic debris into insect "bait".
- Broad label for residential, commercial and industrial applications, including food areas.

### • D-Sect IPM Station

- Patented, discreet, tamper-resistant station for baiting, monitoring, trapping and killing virtually any insect.
- Can be used with D-Sect custom glueboards or D-Sect baiting insert trays.

### • BaitPlate Station

- A sturdy, versatile & economical station for baiting ants, cockroaches and other insects.
- Holds gel, granule and liquid baits.
- Fits inside the D-Sect IPM station.
- Top tab can be opened, closed or removed depending on target pest.

# BorActin™

## insecticide powder

**Non-repellent, 99% boric acid dust**

BAIP005-4C: 454g puffer bottle

BAIP001-6C: 2.27kg pail

## STATIONS

# D-Sect™

## ipm station

**Patented station for baiting & trapping insects**

DSWH048: case of 48 white stations (no trays or glueboards)

DSCL048: case of 48 clear stations (no trays or glueboards)

DCGB300: case of 300 glueboards

DBIT024: pack of 24 clear baiting trays

# BaitPlate™

## station

**Holds gel, granule and liquid baits for baiting ants, roaches & silverfish**

BPCL048: box of 48 stations with service labels and sticky dots
