

Aprehend Biopesticide for Bed Bugs

“Aprehend has been a game-changer in our bed bug protocol. It provides a highly effective solution for clients seeking a safe, eco-friendly alternative to traditional treatments — without compromising performance. As a barrier treatment, Aprehend allows us to position our services more proactively, helping clients prevent issues before they start while creating an additional revenue stream for our business. Overall, we’ve been extremely pleased with Aprehend’s performance and the consistent results it delivers.”

ROB ALARCO, ACE, DIRECTOR OF ANCILLARY SERVICES & SALES ENABLEMENT, SELECT EXTERMINATING, FRANKLIN SQUARE, N.Y.

“Since incorporating Aprehend into our bed bug treatments in 2020, we’ve seen a noticeable improvement in both efficiency and results. It has become our preferred, go-to solution for bed bug control because of the confidence the long-lasting residual provides our team. Just as important, the reduced preparation requirements have made the process much easier on our customers and streamlined scheduling for our office. Overall, Aprehend has elevated the consistency of our bed bug program and continues to be a product we rely on with confidence.”

BRIAN SMITH, CO-OWNER, PREFERRED PEST CONTROL, URBANDALE, IOWA

Features & Benefits

► REVOLUTIONARY BIOPESTICIDE —

Contains the spores of a fungal disease that is deadly to bed bugs, but non-infective to people and pets. The ready-to-use oil is applied in barrier bands around beds and furniture with the special low-volume, low-pressure spray kit. Virtually odorless and non-staining.

► UNMATCHED RESULTS —

Results in days and up to three months of residual control. Effective against adults and nymphs, including pyrethroid- and neonicotinoid-resistant bed bugs. Because it’s nonrepellent, bed bugs freely cross the treatment band and take spores back to the harborage to spread.

► SAVES TIME AND MONEY —

Minimal preparation required for customers and PMPs. No two-week follow-up needed. One 16-ounce bottle of Aprehend treats approximately three to five typical jobs with two bedrooms. Registered in all 50 states and Canada.
